

I am personally tired of the filth allowed on public radio today. Talk of sex, drugs, and gambling are commonplace and so are vulgar lyrics. One radio station that is safe to listen to for the entire family is K-LOVE. They voluntarily keep their format family friendly and losing their signal to a Low Power FM would be devastating for our family and our local community because many of our friends and neighbors also listen to K-LOVE. As the moral state of this country declines, it is nice to have a choice to listen to K-LOVE. The value of their programming heard on often on FM translators is very high.
